

Miracle Electronic Devices Pvt Ltd, the leading provider of Electro Mechanical Components including Toroidal Transformers, Wire Harness and Box Integration Services has announced a strategic Distribution Partnership with Ex-Eltronics Incorporated of UK to exclusively cater to the demands in the Geography of UK and Japan. This new association brings an increased range of coverage and strength of representation of Miracle's extensive product line to this important market geography.

This synergic association will enable Miracle to expand to a broader market horizon and will provide Ex-eltronics Incorporated with an opportunity to offer a wider range of superior solutions and products in its domain of expertise.

Both organizations will be working closely in order to increase the high standard of service and products offered to their customers.

About Miracle Electronic Devices Pvt Ltd: Miracle Electronics was born in the year 1994 with an unwavering aspiration of setting up a world class manufacturing facility-producing state of art transformer and inductors to customers across the globe. In the last 20 years, Miracle has grown by leaps and bounds, and serves over 20 countries across the globe.

Miracle keenly and proactively focuses on technologies that improve ability of a particular component to better performance, reduce wear & corresponding replacement requirement and offer minimal error rate.

Today, Miracle showcases one of Asia's most comprehensive range of Toroidal / Laminated Transformers, Wire Harness, Box Integration, SMPS and Power-Supplies. The gamut spans small Toroidal / laminated transformers to large three-phase auto power transformers and energy saving transformers.

Miracle's products are being used in the sectors of Control Panels, Medical Equipment, Lab Equipment, Aerospace & Aviation, Defense, Process Control Equipment, SPM, Electronic Equipment, Vending Machines, Test & Measurement equipment, Packaging, Automation, Energy Saving Equipment, Entertainment, Audio Equipment, Security Systems, Automobile, CNC Machine

Manufacturing, Marine, Speaker, Energy Meters, LED Drivers, Dc-DC Convertors and UPS manufacturing.

About Ex-Eltronics Incorporated: Since its inception in 1976, Ex-Eltronics has strategically targeted the Military / Aerospace sectors, specifically original airframe and equipment manufacturers and supporting contractors. The Company has established a formidable reputation for its sourcing capabilities and highly attentive, responsive and flexible service. It aims to provide cost competitive, service based purchasing solutions that enable clients to focus more effectively upon their own primary goals, reduce their supplier base and achieve indirect cost savings.

The Company places great emphasis on the importance of long term pro-active relationships and strives to be a true strategic purchasing partner, consulting with clients from project inception through to post-production support. A portfolio of value-added services complements our core business and enhances our capabilities.

The Corporate Headquarters, based on Long Island, New York, house the Company's principal buying office. The UK operation – a wholly owned subsidiary founded in 1982 - manages the global sales interests of its US parent within designated territories and also provides project management expertise for many of the Company's program based and contract manufacturing projects.

Both operations source product in their local markets and ship to a world-wide client base and are very familiar with national export control regulations.
